29th July 2010.

To whom it may concern.

We have had the pleasure of dealing with **Synthetic Grass and Rubber Surfaces Australia** recently when our school was able to revamp a very dusty and well worn area of our school through the 'Investing in our schools project' and replace it instead with TPV Rubber Wetpour.

As part of this project, we chose to use TPV Rubber Wetpour, as supplied and installed through Synthetic Grass and Rubber Surfaces Australia, mainly because of the colour selection, durability and long term effect as well as overall value for money.

The company was very easy to deal with and the product itself was installed easily, effectively and without any dramas. More to the point, I am very happy with the result that we achieved. The colour choice was very good and the resultant picture bright and colourful (as we had hoped) and the children absolutely love it.

We also find that it is soft enough for children to run on without suffering any major mishaps should they happen to fall over on it.

Based on our experience, I would be more than happy to recommend both TPV Rubber Wetpour and the installation company - Synthetic Grass and Rubber Surfaces Australia.

Yours sincerely,

Sharon Kotzur
Principal
