

Synthetic Grass & Rubber Surfaces

AUSTRALIA PTY LTD

Safety, Sporting and Leisure Surfaces

CRICKET PITCH COVERS

Protect your players on the field and protect the cricket pitch surface at the same time, with our new Synthetic Grass rubber infilled cricket pitch covers.

Our covers are made from the highest quality 35mm polyethylene yarn specifically to emulate natural turf. We use a rubber granule infill in this product as it makes it 50% less abrasive and provides a cushioning effect underfoot.

Easily removed cricket pitch cover.

All the Benefits

- Reduces the chance of litigation through Public Liability
- Minimises trip hazards from soil collecting around the cricket pitch
- The Synthetic Grass cricket pitch remains undamaged throughout the season
- The field is ready for immediate use upon installation
- Covers are secure, flat and shock absorbent, therefore reducing the chance of injury to players on the field
- Covers can be taken up and reused season after season
- The covers also assist the aesthetics of the field as our Synthetic Grass is lush and green all year round.

Installed cricket pitch cover with rubber infill.
