Safety, Sporting and Leisure Surfaces

CRICKET TURF RANGE

Across Australia, cricketers in all grades enjoy playing on our all weather Synthetic Grass cricket pitches.

Suitable for indoor and outdoor use, Synthetic Grass can cope with the best and worst weather conditions and can be played on within minutes after rain.

Why ours is the best

Specifically developed for use on cricket pitches or practice bays our Synthetic Grass is made of the highest quality polypropylene fibre, closely tufted to ensure a consistent and true ball bounce every time. A Synthetic Grass pitch can also reduce injury to players by providing a level playing surface and being durable it offers the ability to withstand the pounding given by fast bowlers.

Our Cricket Turf Range Synthetic Grass is available in 3.66m (12ft), 2.79m (9 ft) or 1.83m (6ft) with three varying products.

Competition Turf Generally used for public ovals and competition pitches, this product has a 10mm pile height and a 7 year manufacturer's UV degradation warranty.

Shield Turf Commonly used by schools and clubs, it has a 9mm pile height and a 5 year manufacturer's UV degradation warranty.

Practice Turf As its name suggests it is used for practice nets/bays and enclosures, with a 9.5mm pile height and a 7 year manufacturer's UV degradation warranty.

All edges are tucked into the stump box for optimal performance. The grass is laid with a seam across the middle of the pitch, to allow for correct grass direction whilst bowling or batting.

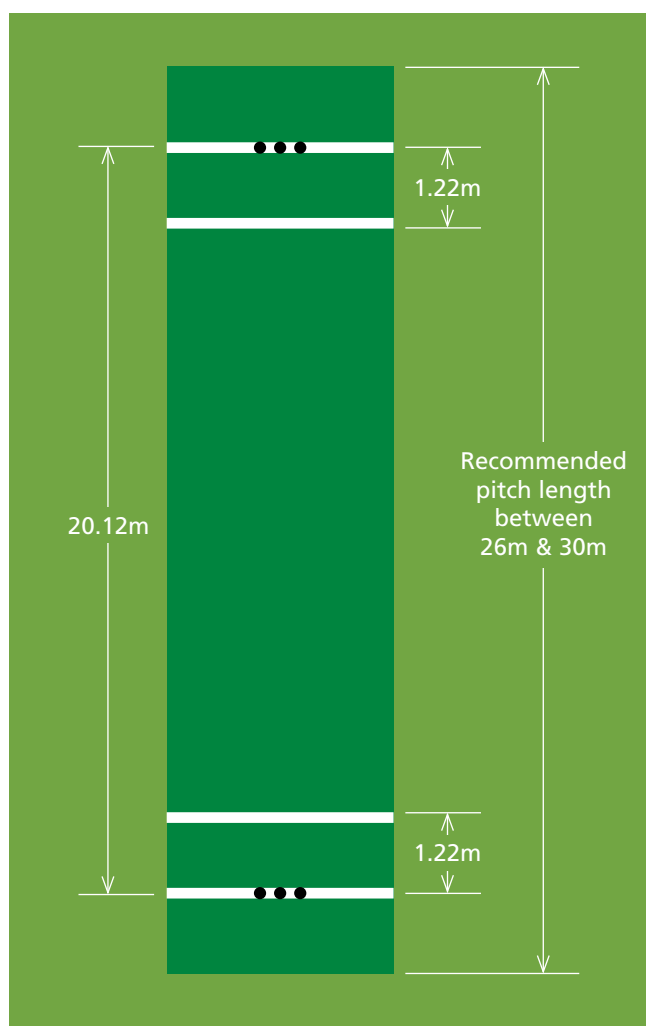

CRICKET PITCH DIMENSIONS

Dimensions of the pitch

A typical cricket pitch has a length of 20.12m between each stump box. The width can vary from pitch to pitch, and the length varies from 26m to 30m in overall length. Available grass widths are as follows: 1.83m, 2.79m, 3.66m.

Outfield

International Suggested 64m to 68.68m radius requiring an area of approximately 1.5ha.
Pennant 68.68m radius from the centre of the pitch.
Junior 40m to 50m radius from the centre of the pitch.
