Subject: RE: Reference for TPV

The City of Canada Bay Council used TPV rubber soft fall at the all abilities Livvi's Place Palyground at Timbrell Park, Five Dock.

The product was chosen for its robustness and ability to maintain its colour even under extreme UV conditions.

The playground averages 650 visitors per week and has been open for nearly 12 months.

The colour and the surface look the same as it did the day it was installed.

The performance of the product has not only exceeded Council's expectations, but the product was professionally installed by Synthetic Grass and Rubber on time and budget even though they had to deal with an accelerated works program.
