WHO WE ARE

Our story

Synthetic Grass & Rubber Surfaces Australia Pty Ltd has earned a reputation as one of the leading synthetic grass and rubber wetpour suppliers in Australia — built on quality products, professionalism, and on-time installation. We're based on Sydney's Northern Beaches and supply and install across NSW and the ACT.

For more than 40 years, Managing Director Mark Cunningham and his team have worked to deliver the best synthetic grass and rubber solutions for safety, sporting and leisure needs. Our staff guide every project from onsite consultation through to installation, care and maintenance.

We're proud that our rubber surfaces are used extensively in schools, childcare centres and playgrounds across NSW and the ACT — non-toxic, anti-slip, and compliant with Australian Standard AS 4422 (Int):2022. We create safe, exciting play environments using bright colours and unique designs — even 3D animals and shapes.

Local Government Approved

A trusted contractor for councils, schools and the Department of Education.

Qualified and Accredited

Our long-term installers bring their skill and professionalism to every job.

Built for Our Climate

No more watering, weeding or mowing — surfaces that stay looking their best year-round.

WHAT WE OFFER

Our services

Advice and Consultation

- Advice on the surfacing required to meet your needs
- Design creation and pattern ideas from our in-house designers
- Guidance on shade structures, netting and accessories
- Quotations from architectural plans

Testing and Accreditation

- In-house and field research and development
- Surfaces comply with Australian and NZ Standards
- Playground surfacing inspections
- Certificates of compliance for new installations

Care and Cleaning

- Specialised tennis court cleaning
- Cricket wicket inspections and cover installation
- Synthetic grass and rubber wetpour cleaning specialists
- Advice on ongoing maintenance

Repair and Maintenance

- Repairs for synthetic grass and rubber wetpour surfaces
- Surface rejuvenation for older installations
- Customised maintenance programmes carried out by our staff

Rubber wetpour soft fall, public playground

SAFE AND FUN PLAYGROUNDS

Soft fall safety surface

A soft fall surface is designed to absorb impact from falls and protect against injury in a playground environment. It consists of a dual-layer structure — a visual wear layer, and a shock-absorbing layer made from recycled rubber underneath.

Each piece of playground equipment has its own free-fall height and soft fall perimeter. Where equipment specifies the soft fall required, we calculate it precisely and guarantee the surface's compliance.

Where no playground equipment has been installed, a wear-layer-only system using rubber wetpour can be used in place of the full dual-layer structure — giving you a safe, seamless surface without over-engineering the build.

We also offer professional Critical Head Impact Testing using the latest equipment, with minimal disruption and no damage to existing materials — giving you full documentation confirming compliance with AS 4422 (Int):2022.

CERTIFIED COMPLIANCE

- **Conforms to Australian Standard AS 4422 (Int):2022**
- **Certified soft fall surfaces, every installation**
- **Certificate of Compliance issued on completion**
- **Free-fall height calculated and guaranteed, even where manufacturers don't specify it**
- **Wear-layer-only systems available where no equipment is installed**

AS 4422 (Int):2022

Every installation certified to the current Australian Standard.

Certificate Issued

A Certificate of Compliance follows every completed installation.

NSW and ACT

Schools, councils and playgrounds trust us across both regions.

Synthetic grass courtyard, Sydney school

SPORTING, RECREATIONAL AND LEISURE

Synthetic grass

From multi-purpose courts and soccer fields to lawn bowls, golf greens, cricket pitches and indoor gym surfaces — the possibilities are endless. Synthetic grass is easy on the joints and provides an optimum playing surface with minimal upkeep, at a fraction of the cost of a cushioned surface.

Our polyethylene synthetic grass guarantees excellent playing conditions, resists matting, and is the safest option against slipping — minimising damage to the skin if a player does go down. It's 50% less abrasive than standard polypropylene, backed by a 10-year manufacturer's UV degradation warranty.

Periodic grooming is all that's required to keep courts and fields in top form — no watering, mowing or ongoing upkeep, so your surface stays playable year-round.

OUR PLAYGROUND SURFACING

- A cost-effective safety solution
- Creates a safe, stimulating learning environment
- Encourages play and physical activity
- Low maintenance, yet long lasting

10-Year UV Warranty

Manufacturer-backed protection against UV degradation.

50% Less Abrasive

Than standard polypropylene, for softer, safer play.

Endless Applications

Courts, fields, greens, pitches and gym surfaces.

Rubber wetpour play space, school

FUN, SAFE, VISUALLY PLEASING

Rubber wetpour

Rubber wetpour is arguably the safest surface for high-risk areas — a poured-in-place system developed to provide maximum safety and play value, built from a recycled rubber base layer and a colourful wear layer, bound with polyurethane to form a continuous, seamless surface.

Our team can create seamless shapes and colour splits, working around existing playground equipment, tree roots and pathways — no flat surface required. We've specialised in playground safety surfacing for over 40 years across schools, kindergartens and public playgrounds, and are a Local Government Approved Contractor.

We offer a range of different rubber wetpour products to suit your budget and surface application — get in touch to find the right fit for your site.

OUR RUBBER WETPOUR IS

- Durable, long lasting and easily cleaned
- Environmentally friendly and non-toxic
- Slip resistant, drains easily
- Resistant to Australian elements
- Doesn't hide debris or vermin, for easy cleaning
- Laid over concrete, steel, tiles or pavers

40+ Years Experience

Specialists in playground safety surfacing since day one.

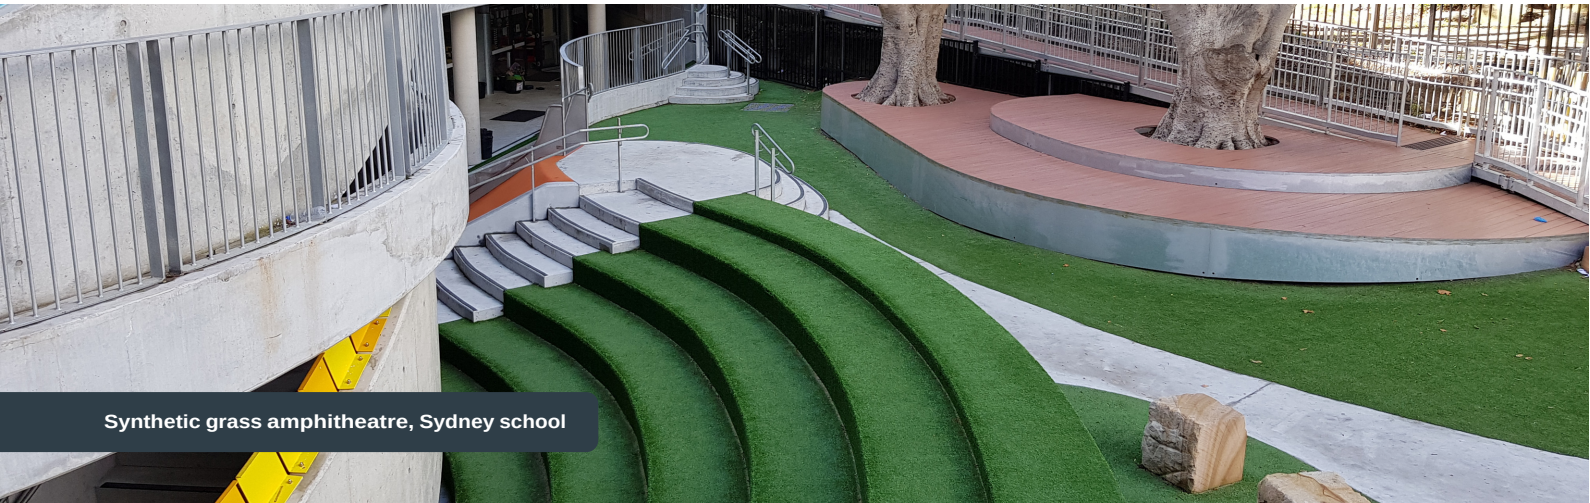

Council and Dept of Education Approved

A Local Government Approved Contractor across NSW.

Any Existing Surface

Concrete, steel, tiles or pavers — no flat surface required.

BACKED BY US

Our warranties

We're proud of the quality of our products and workmanship. Because our range spans different products and applications, warranty terms vary — here's what's included as standard.

12-Month Installation Warranty

Covers workmanship and installation defects across all rubber wetpour and synthetic grass installations.

5–10 Year UV Degradation Warranty

Applies to our synthetic grass, with the term depending on the grass type selected.

5-Year Extended Warranty

Available with our 12-month Cleaning and Maintenance Program, keeping your surface performing at its best.

Quality Assured

Products and workmanship we stand behind on every site.

Clear Terms

Warranty terms confirmed in writing with your quotation.

Maintenance Program

Extend your cover with our 12-month care program.

You have the site, we have the design
